DEM25-0105	Issued	Demolition Permit	3/24/2025	03/26/2025	21870 Russian River Ave Monte Rio [MRO]	<p>This request is for the demolition of an existing detached garage located at the above-referenced property. The structure in question is a single-story, wood-framed garage approximately 8 feet by 16 feet (128 square feet) in footprint. The building is situated on the property line, within the current code-required setbacks, and predates modern zoning and building code standards.</p> <p>The garage is in an advanced state of disrepair and poses a potential safety hazard. It exhibits significant structural deterioration, including:</p> <ul style="list-style-type: none"> • Extensive dry rot in framing members and wall sheathing • A compromised roof structure that is sagging and unstable • Active termite or pest damage • No longer structurally sound and at imminent risk of collapse <p>Due to the degree of degradation, the structure is considered beyond reasonable repair or mitigation. The cost of rehabilitation far exceeds the value of the structure, and its location within current setbacks makes reconstruction in the same location non-compliant with existing County codes.</p> <p>There is no intention to rebuild or replace the garage at this time. The proposed demolition will improve safety on the property, eliminate blight, and allow for better long-term site management and use.</p> <p>All demolition activities will comply with applicable Sonoma County environmental and safety regulations, including:</p> <ul style="list-style-type: none"> • Proper waste disposal and material recycling • Dust and debris control measures during demolition • Compliance with erosion and sediment control if required • Disconnection and capping of any utilities serving the structure • We respectfully request approval of this demolition based on the urgent need to remove a hazardous, non-code-conforming structure that is no longer viable. This action is in the best interest of public safety and the long-term stewardship of the property. 	095-051-008	\$388.84	\$0.00	03/01/2025 - 03/31/2025

GRD25-0060	Ready for Plan Check	Grading Permit	3/28/2025		1832 Alice Dr Penngrove [PEN]	<p>**RENEW PC EXPIRED** GRD20-0287 Pending completion of drainage and grading permit.</p> <p>GRD20-0287 - BRIAN KEEFER 6 MONTHS FROM 11/1/2024</p> <p>RENEW grd20-0287</p> <p>I am proposing to build a 3,000 square foot metal storage building with a 35 panel solar array on the roof. The proposed building will be in an area of my lot that is flat, and currently drains to the existing V-ditch at the south side property line.</p> <p>We have excavated an area of approximately 4,200 square feet (60' x 70'), and removed the existing Black Adobe soil to a depth of 36". We then installed structural fill compacted in 8" to 12" lifts. Currently, the elevation is exactly at the point it was prior to starting the work.</p> <p>The next phase will consist of an additional 12" of compacted structural fill, and then 6" of base rock under a 4"-5" concrete slab. The building foot print will be 60' wide (east to west) and 50' deep (north to south). I am proposing to slope away from all four sides of building pad and conform to existing grade.</p> <p>I am also proposing as part of this project to extend the existing driveway on the west side of property to the new proposed Metal building. This will require removing existing expansive soils and importing structural fill to build a base for the driveway.</p>	047-302-002	\$237.30	\$0.00	03/01/2025 - 03/31/2025

WEL25-0132	Awaiting Applicant Response	Well Permit	3/20/2025		200 Fuente Ln Agua Caliente [AGU]	A total of three geotechnical borings will be excavated and destroyed within 24 hours. One of the borings will extend up to 60 feet in depth, or practical refusal. Borings will be excavated with an 8-inch diameter hollow-stem auger with intermediate soil sampling planned at 5-foot increments. Borings will be backfilled in accordance with California Well Standards (Bulletins 74-81 and 74-90) using a tremie pipe under pressure or equivalent equipment with approved cement grout, proceeding upwards from the bottom to the surface for all borings. The upper one foot of all borings will be sealed with PCC concrete to repair the existing surfaces. Coordinates for proposed borings are as follows: - (38.32106, -122.49232) - (38.32162, -122.49041) - (38.32105, -122.49002)	056-201-094	\$0.00	\$0.00	03/01/2025 - 03/31/2025
